

Metallic™ Backup as a Service

Metallic delivers enterprise-proven data backup and recovery – as a simple, cloud-native solution. Built with proven technology and best-practices from Commvault, plus the power of Microsoft Azure, Metallic provides comprehensive coverage, simple management, and advanced security as you protect your data from deletion, corruption and attack. With Metallic, you'll also get flexibility — from pricing to storage options — in a solution that truly scales. Whether you're protecting 1 terabyte of data, or 1,000+, you've got the power to grow with Metallic.

How we are different

- ✓ Award-winning cloud-based data backup from trusted leaders, Commvault + Microsoft Azure
- ✓ Reduced management overhead, up in minutes
- ✓ Unique SaaS Plus storage flexibility for performance and value
- ✓ Fast performance with flexible, granular restore
- ✓ Ultimate, layered security for ransomware protection
- ✓ Flexible, subscription-based pricing with no capex investment

Why BaaS?

Cloud-based backup & recovery reduces cost and complexity with hassle-free deployment, hands-off maintenance, and no big upfront investments.
