Data Sheet

5320 Series
Universal Edge Switch Platform

Product Overview

The 5320 Series is a family of feature-rich edge switches designed for the next-generation digital enterprise. As a universal hardware platform, the 5320 Series end-to-end secure network segmentation, in addition to advanced policy capabilities, and offers a user-selectable choice of Extreme's flagship switch operating systems. This makes the 5320 a uniquely flexible platform that can be deployed across a range of edge and wiring-closet environments.

The 5320 Series includes fixed 16, 24, and 48-port 1 Gigabit models that are available in 30W PoE and non-PoE versions. The family also includes 16 port PoE models available with either AC or DC power options.

Universal Hardware Platform

The 5320 Series comes with a dual-persona capability allowing user choice of the switch operating system (OS). Either the Switch Engine\(^1\) or Fabric Engine\(^2\) persona can be enabled on 5320 hardware models. The desired persona can be selected at start-up or changed at a later stage. Once selected, the 5320 assumes the features/capabilities of the selected OS.

5320 persona activation can be done manually at boot-up, including via the system CLI. Or, it can be automated by pre-provisioning the 5320 persona in ExtremeCloud IQ. When first booted, the 5320 automatically connects to ExtremeCloud IQ to find its persona. The pre-provisioned OS persona is then remotely enabled on the 5320 system – eliminating the need for manual selection.

---

\(^1\) Switch Engine is the new name for ExtremeXOS (EXOS) on all universal switch platforms, starting with Version 31.6

\(^2\) Fabric Engine is the new name for the VSP Operating System Software (VOSS) on all universal switch platforms, starting with Version 8.6
Ethernet Fabric Services
The 5320 supports a variety of Ethernet Fabric services, including Extreme’s Fabric Connect when running Fabric Engine and Extreme’s IP Fabric when running Switch Engine. It also supports Fabric Attach for automated connection to either Layer 2 or Layer 3 fabric services. Extreme’s Fabric Connect and IP Fabric on the 5320 enable the creation of virtualized networks that automate network operations, simplify network provisioning and enhance security, all while reducing the strain on network and IT personnel.

Intelligent Layer 2/3 Services
The 5320 Series provides sophisticated Layer 2 switching as well as advanced Layer 3 routing services. This includes role-based policy, bidirectional Access Control Lists, as well as granular ingress/egress bandwidth control. Layer 3 services include IPv4 and IPv6 dynamic routing, as well as IP multicast services.

Power Over Ethernet
The 5320 Series includes Power over Ethernet (PoE) models supporting standards-based 30W IEEE 802.3at PoE capabilities. This enables the 5320 to address the needs of powered edge devices, while eliminating the need for additional electrical cabling and circuits. In addition, 5320 PoE models also support perpetual and fast PoE for even more efficient and reliable powered edge device operation.

High-Performance Stacking
Two of the 5320’s built-in SFP+ uplink ports can be used for high-speed stacking when running Switch Engine. Up to eight systems can be stacked using qualified 10Gb direct attach cables and optical transceivers. (Note: Stacking is not supported when running Fabric Engine).

1Gb Uplinks Upgradeable to 10Gb
All 5320 Series units include integrated SFP+ capable uplinks that support 1Gb SFP by default, but which can be upgraded to 10Gb via software. 24 and 48-port 5320 models come with 8 x 1Gb SFP uplinks; 16-port models offer 4 x 1Gb SFP uplinks. 1Gb SFP uplinks are upgradeable to 10Gb SFP+ through an optional software license. (Note: Two of the 5320 uplink ports are available for Switch Engine stacking and when used in this manner support 10Gb by default.)

Silent Operation
Silent mode operation at temperatures up to 35°C is supported on 5320 16-port AC and DC-powered models. This makes these models ideal for classrooms, hospitality suites, retail sites or other noise sensitive environments, especially outside of the wiring closet environment.
## External Interfaces

Environmental

Environmental Specifications
- EN/ETSI 300 019-2-1 v2.1.2 - Class 1.2 Storage
- EN/ETSI 300 019-2-2 v2.1.2 - Class 2.3 Transportation
- EN/ETSI 300 019-2-3 v2.1.2 - Class 3.1e Operational
- EN/ETSI 300 753 (1997-10) - Acoustic Noise
- ASTM D3580 Random Vibration Unpackaged 1.5 G

Environmental Compliance
- EU RoHS - 2011/65/EU
- EU WEEE - 2012/19/EU
- EU REACH - Regulation (EC) No 1907/2006 Reporting
- China RoHS - SJ/T 11363-2006
- Taiwan RoHS - CNS 15663(2013.7)

Environmental Operating Conditions
- Temp: 0° C to 50° C (32° F to 122° F)
- Humidity: 10% to 95% relative humidity, non-condensing
- Altitude: 0 to 3,000 meters (9,850 feet)
- Shock (half sine): 30m/s² (3G), 11ms, 60 shocks
- Random vibration: 3 to 500 Hz at 1.5 G rms

Packaging and Storage Specifications
- Temp: -40° C to 70° C (<-40° F to 158° F)
- Humidity: 10% to 95% relative humidity, non-condensing
- Packaged Shock (half sine): 180 m/s² (18 G), 6 ms, 600
- Packaged Vibration: 5 to 62 Hz at velocity 5 mm/s, 62 to 500 Hz at 0.2 G
- Packaged Random Vibration: 5 to 20 Hz at 1.0 ASD w/-3 dB/oct. from 20 to 200 Hz
- Packaged Drop Height: 14 drops minimum on sides and corners at 42 inches (<15 kg box)

Regulatory and Safety

North American ITE
- UL 60950-1
- UL/CuL 62368-1 Listed
- CSA 22.2 No. 60950-1 2nd edition 2014 (Canada)
- Complies with FCC 21CFR 1040.10 (U.S. Laser Safety)
- CDRH Letter of Approval (US FDA Approval)

European ITE
- EN 60950-1 2nd Edition
- EN 62368-1

Ordering Notes
Customers ordering a 5320 Series switch receive the hardware switch along with Base software license, integrated power supply, fan module and rack-mount kit. In addition, each 5320 switch comes with a free 1-year ExtremeCloud IQ Pilot subscription. Optical transceivers and power cords must be separately ordered. 10Gb upgrade licenses (4-port and 8-port), as well as Premier and MACsec licenses must also be ordered separately.

Base Software and Optional Premier License
The Base software included with each 5320 unit supports most available software features. Certain features, however, require a Premier License to operate:

For Switch Engine, a Premier License is required for:
- 5 or more OSPF interfaces
- PIM DM/PIM SSM
- Anycast RP (Rendezvous Point)
- MultiSource Discovery Protocol (MSDP)
- IS-IS/BGP4/MBGP
- GRE Tunneling
- Ethernet VPN (EVPN)

For Fabric Engine, a Premier License is required for:
- 5 or more OSPF active interfaces
- 3 or more BGP Peers
- Layer 3 Virtual Service Networks (L3 VSNs)*

*5320 16 and 24-port models do not require a Premier License for the single L3 VSN supported in these models

Notes on 5320 10Gb upgrade licenses
A 30-day evaluation of the 4-port 10Gb upgrade license is included with each 5320 unit to aid in set-up and onboarding. Otherwise, a 4-port or 8-port 10Gb upgrade license is required for 10Gb uplink operations on the 5320. 10Gb stacking, however, does not require a separate 10Gb upgrade license. Two (2) 4-port 10Gb upgrade licenses cannot be combined to enable 8 x 10Gb uplinks; instead, an 8-port 10Gb upgrade license must be purchased. If you have a 4-port 10Gb license already installed and want to replace it with an 8-port 10Gb license, you can reuse the 4-port license on a different 5320.

* When running Fabric Engine on 24 and 48-port 5320 models, 3 of the 8 uplink ports are blocked in support of Ethernet Fabric Connect (SPB) functionality
Warranty
All 5320 Series models are covered under Extreme’s Universal LLW policy. For warranty details, please visit: http://www.extremenetworks.com/support/policies

Maintenance Services
Extreme’s maintenance and support services with 100% in-sourced engineering experts and over 90% first-person resolution ensure efficient operation of your business-essential network. 24x7x365 phone support, advanced parts replacement, and on-site support augment your staff with experienced resources that help you mitigate critical network issues fast. Visit Extreme Maintenance Services for more information.

Optics/Transceivers
For a list of the optics/transceivers supported on the 5320 Series hardware, refer to our Extreme Optics Compatibility Tool at https://optics.extremenetworks.com

Power Cords
In support of Extreme Networks green initiatives, power cords are not included with the 5320, but can be ordered separately. They should be specified at time of ordering.
