

Maximizing the
power of water®

Why ChemTreat?

Our water management strategies help you optimize operations, improve performance, and meet environmental goals. The ChemTreat team is committed to applying our extensive knowledge and experience toward your success. Let's work together to maximize the power of water and transform the future for your business, your customers, and for people everywhere.

Water Conservation

Increased capacity and asset protection

Energy Savings

Environmental sustainability

Applications Experience

The ChemTreat difference lies in the application of our advanced technologies and the partnerships we form with our customers.

Over the past 50+ years, we have developed a complete line of efficient and sustainable industrial water treatment services designed to help you save money, improve operating efficiency, extend asset life, and reduce plant downtime.

Our technical experts typically have over 20 years of experience, delivering value by solving your toughest water treatment challenges.

Our Capabilities

ChemTreat offers a full suite of solutions for industrial water treatment applications.

PRETREATMENT

Solutions to minimize membrane cleaning and replacement, reducing the overall cost of pretreatment

PROCESS OPTIMIZATION

Process application support ranging from cleaning to control technologies that can drive increased production efficiency and product quality

INFLUENT CLARIFICATION

Chemical treatment to remove impurities from a wide range of source waters for utility makeup & other industrial processes

WATER REUSE

Water reuse strategies to minimize water consumption and stay ahead of emerging water scarcity issues

UTILITY WATER TREATMENT

Cooling tower and boiler treatment programs to increase system efficiency, minimize operating costs, and extend equipment life

WASTEWATER TREATMENT

Environmentally sustainable treatment methods to reduce discharge costs

Intelligent Water Management

In addition to our expert teams and best-in-class water treatment solutions, we also offer CTVista[®]+, a cloud-based water management platform that enables monitoring and control of your water treatment programs by providing:

- Data management
- Analytics
- Reporting
- Real-time guidance

OUR PEOPLE

As close to the customer as possible

OUR FACILITIES

Strategically located manufacturing facilities and distribution centers

State-of-the-art R&D/Tech Services lab capable of new product formulation in days, not weeks

WE'VE GOT YOU COVERED

ChemTreat and affiliate locations include:

**MANUFACTURING/
QUALITY ASSURANCE
LABORATORY:**
Ashland, VA

**MANUFACTURING
PLANTS:**
Eldridge, IA
Fontana, CA
Nampa, ID
Nederland, TX
Santiago, Chile

WAREHOUSES:
Pooler, GA
San Diego, CA
Santa Fe Springs, CA
Calgary, Alberta, Canada
Montreal, Quebec, Canada
Toronto, Ontario, Canada
Mexico City, Mexico
San Juan, Puerto Rico
Antofagasta, Chile
Sao Paulo, Brazil

KEY

ChemTreat:

- ▲ International Headquarters
- District Offices
