

# Cable Landing Station Wavelength Backhaul

## Zayo Owns and Operates the Fastest Growing High Capacity Network to Cable Landing Stations in North America & Europe

At Zayo, we're always on your wavelength. Our optical Wavelengths service provides dedicated bandwidth from the cable landing stations to major data centres, carrier hotels and enterprise locations across our long-haul and metro networks. We also provide custom solutions to meet your diversity and latency needs by using our unique routes that can bypass the major carrier hotels, data centres and other carrier routes to many relevant points-of-interest for all regional, cross-country, or international backhaul requirements.

**Service Bandwidth:** 1G, 2.5G, 10G, 40G, 100G, OTU2, OTU2e, OTU4, OTU4e  
**Service Capabilities:** standard, diverse, protected, spectrum

**17 CABLE LANDING STATIONS**

**1K+ ON-NET DATA CENTERS**

**23K QUOTABLE LOCATIONS**

**11K ON-NET LOCATIONS**

**600+ 100G POP's**

**166TB NETWORK TRAFFIC**
