ChemTreat works with our pharmaceutical clients to help improve their cooling, boiler, purified water, and chemical handling systems as well as offering solutions to help them reduce their environmental footprint and improve asset reliability.

The Best People

We leverage our team of specialists to offer best-in-class water treatment solutions.

- Network of experienced field engineers with a vested interest in your success
- Application Technology team with unparalleled industry expertise and problem-solving capabilities
- R&D group specializing in the development of customized solutions
- Full-service analytical lab offering comprehensive testing and quick turnaround

Asset Protection

We help you ensure quality and increase efficiency in your systems.

- Increasing productivity through the reduction of downtime for cleaning & maintenance
- Extended asset life with protection programs that efficiently utilize water and energy resources
- Increasing energy efficiency through improved heat transfer and control systems
- Optimized system performance with programs tailored to high-stress conditions

Sustainable Solutions

We have products and services that help improve performance while protecting natural resources.

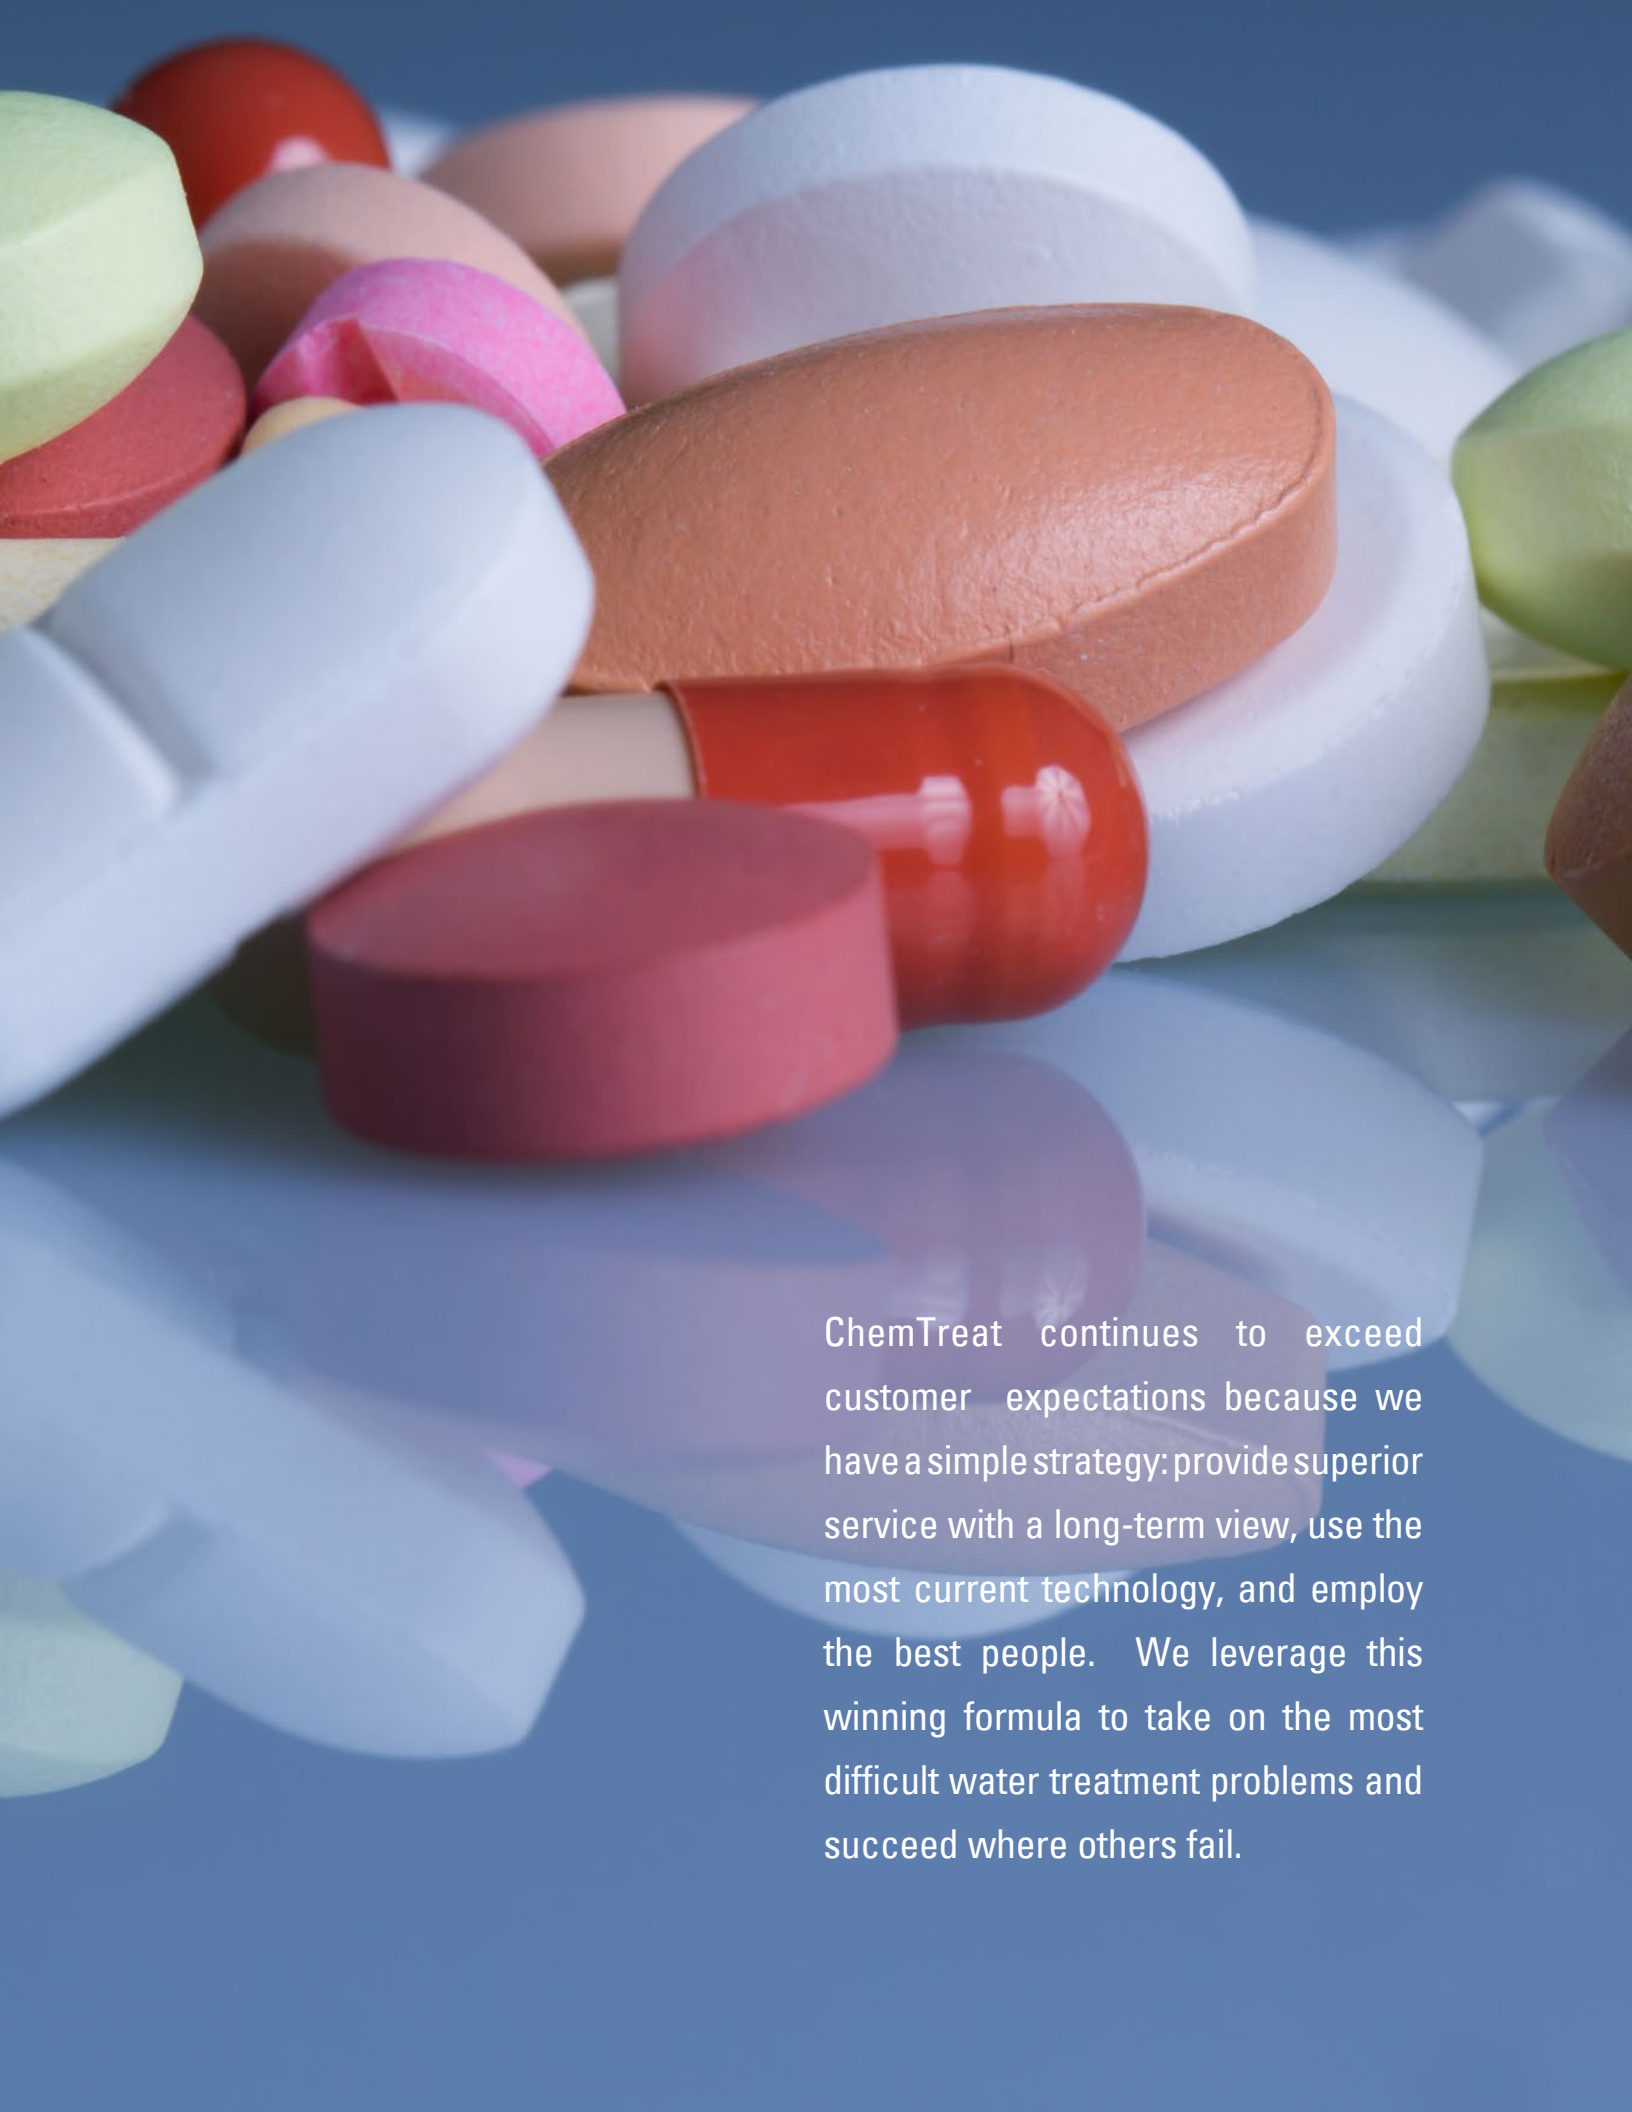

- Reduced energy usage through customized system optimization
- Engineered solutions to ensure the safety of your valued employees
- Product options to help you meet your site's environmental goals
- Proven strategies for effective water and wastewater reuse

Continuous Innovation

We offer advanced technology for your varying array of complex systems.

- Customized products designed for unique water and equipment needs
- High-performance low- and non-phosphorus cooling water treatment options
- Enterprise-level data management to measure quality and conformance
- Web-based water treatment communication and control for 24/7 system monitoring

ChemTreat continues to exceed customer expectations because we have a simple strategy: provide superior service with a long-term view, use the most current technology, and employ the best people. We leverage this winning formula to take on the most difficult water treatment problems and succeed where others fail.

ChemTreat's Enhanced Offerings

Utility Treatment

- Solutions for advanced process cooling water and steam systems
- High-stress corrosion and deposit control programs for reactors
- Phosphate-free programs to reduce environmental impact

Automation and Control

- Custom-designed monitoring and control packages to optimize system efficiency and performance
- Fluorescence monitoring technology for traced treatment programs
- Web-enabled data management to provide real-time reporting and analysis

Purified Water Treatment

- NSF-approved chemistries to help optimize the life and performance of membrane systems
- Cleaners and sanitizers for media beds and filtration systems
- Antiscalant treatment and cleaners for reverse osmosis

Wastewater Treatment

- Wastewater reuse programs to reduce plant discharge and makeup and help you meet your environmental goals
- Data management systems to help support your regulatory efforts and quality audits
- Chemical handling programs to help reduce waste

Customer Education

- Comprehensive team training to help with the startup of water management programs
- Seminars and workshops to communicate best practices and new technologies
- Audit programs to ensure efficiency of operations and highlight cost savings opportunities

*Enhanced offerings are optional services. They are not part of all treatment packages.
ChemTreat cannot guarantee results.*
