

# EXPLORE EVEN MORE

Visit our CAMX Conference Program presentations to learn more about advances in materials, processing, and testing technologies from PolyOne experts

## WEDNESDAY, OCTOBER 17

### **Static and Dynamic Materials Analysis of a Carbon Fiber Epoxy Pultrusion System**

Yves Cordeau  
9:30 AM-9:55 AM  
Room D221

### **High Throughput Fabrication of Lightweight Components by Injection Over Molding of Continuous Fiber Thermoplastics**

Daniel Flagg  
10:00 AM-10:45 AM  
Clear Fork - Ballroom D1

**THURSDAY,  
OCTOBER 18**

**Design and Material  
Selection of Thermoplastic  
Composite Panels for  
Structural Components**

Darcy Hornberger  
8:00 AM-8:45 AM  
Room D220/D227

**Unique Methodology for  
Testing Transverse Tensile  
Properties of Unidirectionally  
Reinforced Pultruded  
Composites**

Fayaz Ali  
9:00 AM-9:25 AM  
Room D222

**Effect of Kaolin Clay as Filler  
on Mechanical Properties  
of Unidirectional Reinforced  
Pultruded Composites**

Fayaz Ali  
11:30 AM-11:55 AM  
Clear Fork - Ballroom D1

**Secondary Forming and  
Performance Characteristics  
of Continuous Fiber  
Thermoplastic Composites**

Darcy Hornberger  
2:00 PM-2:45 PM  
Room D221
