

SAP HANA or SAP BWA Deployment Services

Speed time to productivity with SAP HANA or SAP BWA deployment

Lack of time or resources can limit your ability to take advantage of new technologies and applications. SAP-certified Lenovo consultants evaluate, implement, and manage your SAP HANA or SAP BWA solution, allowing your IT team to focus on other priorities.

Lenovo SAP HANA or SAP BWA Deployment Services helps accelerate time to productivity while providing a foundation for enhanced operational performance and reliability. The Lenovo Services team employs best practices and established methodologies to install, configure, and validate your hardware, networking, and SAP HANA or SAP BWA hardware infrastructure.

Lenovo SAP HANA or SAP BWA Deployment Services accelerates time to market with fast, efficient implementation and reduces risk of failures by following structured processes. These services also help minimize disruptions through proper planning and data center preparation. And they empower you to get quick, effective responses from experienced SAP HANA/BWA hardware consultants, deploy SAP HANA Tailored Data Center Integration (TDI), and obtain personalized advice from our consultants.

Lenovo can also help ease the challenges of managing your SAP HANA or SAP BWA system with ongoing managed services or periodic site health checks to help optimize the potential of your SAP software. Using our expertise in infrastructure management for SAP environments, we work with you to update your configuration and share best practices to reduce costs and maximize the return on your technology investment.

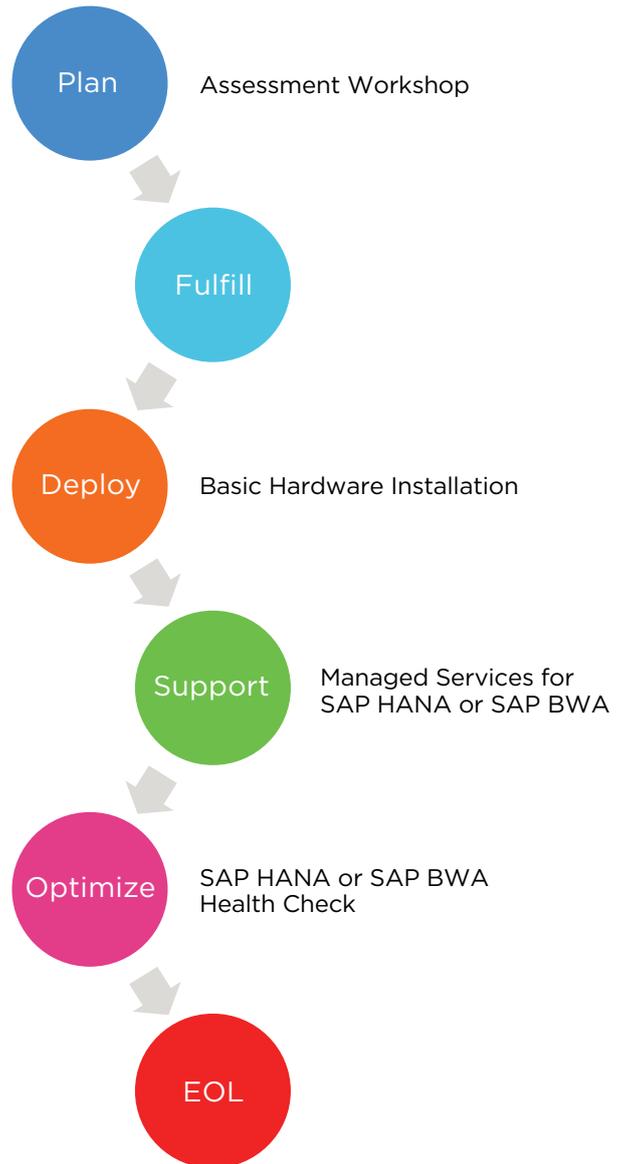

Deployment Services Process

The Lenovo Services team is committed to ensuring a fast, smooth deployment through diligent pre-installation planning, structured governance, and detailed post-installation reporting. Lenovo SAP-certified consultants guide you through every step of your project as they carry out these key deployment services:

- Perform an inventory and validation of the delivered system configuration
- Verify and update your hardware to the latest level of BIOS, firmware, device drivers, and OS patches, as required, and verify and configure storage
- Install the SUSE Linux Enterprise Server (SLES) or Red Hat Enterprise Linux (RHEL) operating system on the SAP servers
- Configure and verify network settings
- Install, configure, and verify the file system (GPFS or XFS)
- Install HANA IMDB—for SAP HANA—or SAP TREX software—for SAP BWA
- Conduct an SAP HANA or SAP BWA system validation
- Provide on-site skills transfer and deliver post-installation documentation

Customers Who Obtained These Services Also Considered...
