

TELADOC HEALTH
CONNECT EMBEDDED

Bring audio/video into your existing applications

Launching audio/video consultations from within existing systems creates seamless workflows and a more integrated way to treat your patients virtually.

Simplify your daily routines using Connect Embedded to bring Teladoc Health's superior web-based audio/video experience into your EHR or other applications for a reliable, straightforward telehealth experience — whether you're the patient or the provider.

- Industry's most reliable network
- High level of security¹
- Designed for healthcare
- Context-aware linking for easy implementation
- Seamless integration with existing EHR-based workflows

A new level of interoperability

Powered by Solo™

Solo, healthcare's next-generation software platform, enables two-way integrations with your existing HIT investments to connect people, systems, devices and applications, keeping data and patient information at your fingertips.

Maximize your time by using Solo to leverage the Connect Embedded Solution into your EHR and other applications to care for patients at home, in a clinic, or beyond for an immersive, patient-centric view of your clinical workflows.

The backbone of virtual care

Easily exchange data

Your EHR is the backbone of patient data and represents an important investment in your larger digital health initiatives. Use the Connect Embedded Solution to leverage your existing HIT investments, like your EHR, and unify workflows across the patient care journey.

Allow users to schedule appointments and easily launch a virtual visit for reliable, high-quality virtual care while protecting and securing sensitive healthcare information.

1. Customers will schedule and create virtual appointments within your EHR.
2. When a patient logs into their portal, they are able to launch a video visit, which will then take the patient into a virtual waiting room.

3. The provider will log into the EHR and find the patient record. The provider can then click on the link for the session and it will launch the Provider Access Web App.

Now available in the Epic App Orchard
