COMMVAULT ACTIVATE™

HPE Complete products

Commvault

Commvault is a part of the HPE Complete program, helping you with the convenience of one-stop shopping for tested and validated HPE and Commvault end-to-end solutions for data protection and data management across the entire HPE storage portfolio.

Commvault has the largest breadth and depth of coverage across the HPE server and storage portfolios than any vendor.

Commvault also has the largest ecosystem of supported enterprise applications, hypervisors, storage arrays, containers, and cloud storage providers.

Commvault was awarded the 2019 Technology Partner of the Year and 2020 Momentum Storage Partner of the Year from HPE for tightly integrating its data protection and data management solutions across the HPE storage and server portfolios.

The data insight toolkit: Utilize your data for business insight, search, and discovery. Overcome data compliance and governance challenges. Visualize your data storage.

BE READY TO KNOW MORE ABOUT YOUR DATA.

Today's businesses are increasingly reliant upon data to make informed decisions. With so much data out there, you need intelligent solutions to help you find, sort, and classify valuable data from redundant data.

Unfortunately, what you don't know about your data can damage your business in big ways—in data loss, data breaches, compliance failures and fines, higher costs, and brand damage.

ACTIVATE YOUR DATA: FIND VALUE. REDUCE RISK.

Commvault Activate™ is a solution set of data services that can operate independently of Commvault Complete Backup & Recovery™ Data Protection or as part of a combined solution to maximize data management capabilities for your business. This means that with Activate you can gain valuable insights into all of your data, even if it's not protected and managed by Commvault.

By 2022, 90%[1] of corporate strategies will explicitly mention information as a critical enterprise asset and analytics as an essential competency.

HPE Complete benefits

- **Single HPE purchase order**— One-stop shop for both HPE and third-party branded products.

- **Build with confidence**— HPE Complete Assured validation of compatibility and interoperability.

- **Customer experience**—Simplified solution deployment with custom HPE integration guides and tools.

- **HPE Complete Assured**— HPE Complete Assured testing validates reliability and interoperability of partner products with HPE storage and server solutions and ensures solution concurrency over time. Customers can rest easy knowing the combined solutions work seamlessly together now and into the future.

YOUR DATA: KNOW IT. ACT ON IT.

By knowing more about your primary and secondary data, you can more effectively anticipate and respond to changing business needs. With better insight about your data, you can make better decisions.
Knowing your data means you can:

- Analyze your data across data silos to classify and prioritize it—reducing data sprawl and more efficiently managing your resources.

- Visualize key details, including what data resides where, who owns the data; is the data sensitive and is it secure, protected, and recoverable if and when needed?

- Action orphaned data, quarantine, or delete sensitive data, and rapidly respond to eDiscovery, compliance, and legal requests.

PRACTICAL USE CASES. UNMATCHED BUSINESS VALUE.

Whether you leverage Activate independently or combined with Commvault Complete™, it will enhance your data strategies and data value through these powerful and practical use cases.

- **File storage optimization:** Analyze and drive efficiencies into your data environment by removing data sprawl, remediating orphan data, and classifying/prioritizing your data.

- **Data governance:** Define, find, and manage critical and sensitive data by uncovering sensitive data, responding to data requests, and through proactive data cleanup.

- **eDiscovery and compliance:** Streamline responses to legal and compliance activities through consolidated enterprise-wide search, rapid legal hold/mark, and by exporting and securing sensitive data.
