

UVGEL PRINT FACTORY

Jumbo Roll-to-Roll Production

SMART CHANGE STARTS HERE.

HELP INCREASE YOUR PRINT PRODUCTION CAPACITY WITH THE UVGEL PRINT FACTORY

Help save time and money by decreasing media load frequency when printing on lower cost jumbo rolls of media.

The UVgel Print Factory, designed in cooperation with Canon Solutions America and Colex (U.S. distributor of Fotoba equipment), combines the high-quality print capabilities of the Canon Colorado with the Fotoba Motorized Heavy Duty Loader and Takeup Systems to enable uninterrupted printing of large banners, posters, wallpaper, and other large format graphics.

With its advanced UVgel technology, the Colorado can print up to 1,709 square feet per hour, making it one of the fastest large format printers on the market. The printer also boasts high resolution printing capabilities of up to 1,800 dpi, delivering stunningly crisp and vibrant prints. The FLXfinish+ upgrade makes it possible to print gloss and matte at the same time. The industrial JRL170 Motorized Heavy Duty Feeder and JRR170 Motorized Heavy Duty Takeup handle 30" diameter rolls weighing up to 880 lbs.

UVgel Print Factory Design

1. Fotoba Motorized HD Roll Feeder JRL170
