

IS YOUR OFFICE 365 DATA READY? ARE YOU?

Your move to Office 365 is underway. You need to be ready. Knowing you can find and optimize all your Exchange & Office 365 data when you need it is essential. **Be ready with Commvault.**

01

PROTECT YOUR DATA

With Commvault confidence. Comprehensive, policy-driven data protection & recovery across Office 365 and Exchange, including SharePoint, OneDrive and Microsoft Teams—all your data, wherever it resides.

02

MIGRATE YOUR DATA

Save migration time with proven workflow support. Reduce the amount of data migrated to Office 365. Migrate only active mailboxes & data. Archive the rest and retrieve it when you need it.

03

FIND YOUR DATA

Improve data governance & compliance. Address it all plus your legal requirements with industry leading, comprehensive search. Powered by Commvault's exclusive 4-D indexing.

Commvault Complete™ Backup & Recovery

- ✓ Search across all Office 365/ Exchange data—anywhere
- ✓ Recover from accidental deletion
- ✓ Protect against all security threats (both internal/external)
- ✓ Automate routine backup/ recovery tasks
- ✓ Self-adjust with machine learning (AI applied here)
- ✓ Confidently meet compliance requirements

MAKE SURE YOUR

MANAGEMENT & PROTECTION IS COMPLETE.

And do it all regardless of where your data lives—with the confidence of Commvault.

COMMVAULT OFFICE 365 DATA PROTECTION IS QUICK—
2 MINUTES QUICK.

WATCH NOW

If you're considering (or already) protecting your Office 365 data with "the other guys" you could be in for a big surprise (and big costs!) when asked to find your data—all your data. Make sure you're **READY** with Commvault.

Don't add another point solution—Make your Office 365 protection Commvault Complete.

IT'S ONE PLATFORM—THAT'S ALL.

"Office 365 uses what it calls the 'shared responsibility model'...customers are responsible for...their data that resides in the Office 365 infrastructure."

Osterman Research Report: Enhancing Data Protection in Microsoft Office 365, June 2019
