Refiners and Chemical producers are constantly striving to increase asset availability while achieving the highest level of safety and compliance. ChemTreat’s water management strategies improve the reliability of operations, protect employees and the environment, and ultimately make our customers more competitive.
The Best People
Leveraging Our Resources to Deliver Peace of Mind

- Global network of experienced field engineers with a vested interest in your success
- Application Technology team with unparalleled industry expertise and problem-solving capability
- R&D group that specializes in the development of customized solutions
- Full-service analytical lab that offers comprehensive testing and quick turnaround

Lasting Results
Helping Our Customers Do More With Less

- Maximizing energy efficiency through improved heat transfer & control systems
- Extending asset life with protection programs that efficiently utilize water & energy resources
- Increasing productivity through the reduction of downtime for cleaning and maintenance
- Optimizing system performance with programs tailored for high-stress conditions

Sustainable Solutions
Products & Services That Improve Performance While Protecting Natural Resources

- Reduced energy usage through customized system optimization
- Engineered solutions to ensure the safety of your valued employees
- Green product options that reduce the impact on the environment
- Proven strategies for water and wastewater reuse

Continuous Innovation
Advanced Technology For Complex Systems

- Customized products designed for unique water & equipment needs
- Eco-friendly, high-performance cooling technology
- Turn-key solutions for on-site chlorine dioxide generation
- Web-based water treatment communication & control systems
ChemTreat continues to exceed customer expectations because we have a simple strategy: provide superior service with a long-term view, use the most current technology, and employ the best people. We leverage this winning formula to take on the most difficult industrial water treatment problems and succeed where others fail.
ChemTreat’s Enhanced Offerings

Cooling Water
- Specialized chemistries for water reuse options
- High stress corrosion and deposit control programs
- Chlorine dioxide and other chlorine gas alternatives
- Online and off-line cleaning and passivation technologies

Boiler Treatment
- High pressure boiler treatment programs and control strategies
- Chemistries and cleaners to optimize the life and performance of pretreatment systems
- Full line of custom oxygen scavengers and amine blends

Wastewater Treatment
- Programs developed to ensure environmental compliance
- Wastewater reuse as a source for cooling water
- Optimizing dewatering chemicals to minimize cost of operations
- Engineered solutions for safe handling and storage

Automation and Control
- Advanced Automation & Control designed to network with the plant DCS
- Fluorescence monitoring technology for traced treatment programs
- Web-enabled data management to provide real-time reporting and analysis
