

Highlights

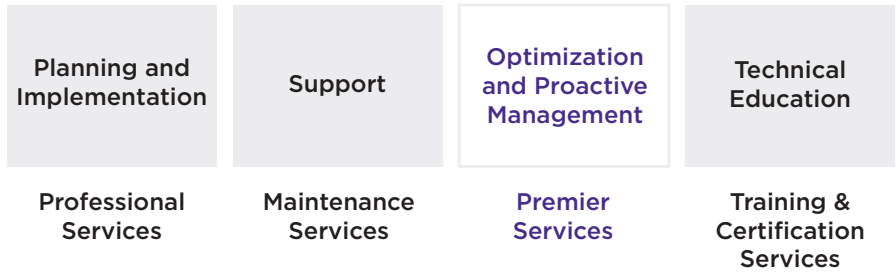

What's Important to You?

- Are you running applications that are mission-critical to your company's productivity?
- Does your company have a large percentage of geographically dispersed employees?
- Does your company use cloud-based applications that require a robust and reliable network infrastructure?
- Does your company have users with multiple device connectivity?

Many of our customers have these types of business environments that depend heavily on their companies' network infrastructures.

Premier Support is a proactive, high touch service that assists you in managing your dispersed Extreme Networks environment around the campus or the world, providing resources to manage your day-to-day technical needs, and a watchful eye on your Extreme Networks investment.

Premier and PremierPLUS Support

Proactive Network Support and Management – When You Need It, Where You Need It.

Premier Support is a proactive, high touch post sale support service that assists customers in managing their Extreme Networks products and network. All resources and deliverables are designed to manage your day-to-day technical needs, provide analysis and recommendations while building strong customer relationships, all focused at the network level.

With all the tasks that IT organizations must focus on, having confidence in their network's performance should be a given. Premier and PremierPLUS Support help to ensure your confidence after the deployment of the equipment by:

- Understanding your network requirements and your business needs thoroughly.
- Recognizing network issues BEFORE they create a problem.
- Maximizing your employee productivity through increased network uptime and reliability.
- Ensuring you have one single point of contact for all your support needs, from asset management to problem resolution.
- Providing visibility into how the Extreme Networks solution is being used to maximize your return on investment.
