## Introduction

---

This document provides Extreme Networks software lifecycle planning information for use by customers and partners, and outlines the timeframes when software feature enhancements, maintenance releases, and technical support are available, as well as End of Software Maintenance and End of Support Life dates for each software release.

**WARRANTY:** Extreme Networks offers firmware, operating system software, and application software products, with various warranties included in the software purchase price. Please refer to specific product literature for warranty details.

**SERVICES:** Extreme Networks also offers various services at additional cost. Refer to the Services Solutions web page for details:

<http://www.extremenetworks.com/support/>

Only products which are covered by a valid service contract are eligible for software upgrades/updates and technical support, per the specific terms of the warranty or service contract. Some product warranties provide limited access to software upgrades/updates and/or technical support. Refer to the specific warranty terms available at <https://www.extremenetworks.com/support/policies/>.

The Extreme Networks End of Life policy document defines entitlements and other terms and conditions for End of Sale, End of Software Maintenance, and End of Service Life for Extreme products. The End of Life policy document is available at <https://www.extremenetworks.com/support/policies/>.

## Definitions

---

### **End of Sale**

The product End of Sale (EOS) date is the last date that a product is available for sale through Extreme systems, while supplies last. Product Availability is not guaranteed through the End of Sale date, and products will be provided while supplies last.

### **End of Software Maintenance**

The End of Software Maintenance (EOSM) date is the last date that Extreme will release any maintenance or patch releases for a specific major software revision. During the Software Maintenance period, Extreme reserves the right to determine which defects will be fixed. Note that a software upgrade to a later release may be necessary to correct a reported problem.

### **End of Services Life**

The End of Service Life (EOSL) date is the last date to receive service and support for the product. After this date, all support services for the product are unavailable, and the product becomes obsolete and software and other product related information will be removed from the Extreme support website.

**Note:** For Software releases between EOSM and EOSL, Support deliverables are limited to GTAC assisting in mitigating issues, troubleshooting HW issues and assistance to migrate to a supported software release

Refer to the Extreme Networks End of Life policy document at <https://www.extremenetworks.com/support/policies/> for further details.

## Summary Software Lifecycle Policy

For products which have not been announced for End of Sale, Extreme Software Lifecycle policies are defined below, based on the product family. “Current” refers to the most recent feature release, while “Current -1” refers to the prior feature release and “Current -2” refers to the release prior to “Current -1”.

Software family	Supported releases
Applications	Current, Current – 1
WING OS	Current, Current -1, Target Path
Extreme Wireless OS	Current, Current -1, Target Path
EXOS OS	Current, Current -1
VOSS / VSP OS	Current, Current -1, Current -2
BOSS / ERS OS	Current, Current -1
SLX, NOS, NI	Current, Current -1, Extended Life

### Target Path Definitions:

**WING/Extreme Wireless:** Certain releases will be designated Target Path releases which means that the release will be supported for 36 months from the GA date of that release. Only one Target Path release will be supported at any time.

### Extended Life Definitions:

**SLX, NOS, NI:** Periodically, certain releases will be designated Extended Life releases which means that the release will be supported for 36 months from the GA date of that release.

Note that while the general policy is defined above, the dates (if provided) in this document represent the official End of Software Maintenance (EOSM) and End of Service Life (EOSL) for a particular software release.
