

Direct Cloud Connectivity to U.S. Government Clouds

According to Gartner, **47% of government agencies** at all levels now use the cloud.¹ The IDC predicts federal cloud investments to reach **\$3.3 billion in 2021**.¹

Data and workloads tied to government agencies at all levels are sensitive and need a highly secure cloud. AWS and Azure have created cloud storage and cloud computing environments specifically for government agencies. These clouds are highly secure and meet all compliance and regulatory requirements.

CloudLink by Zayo is a direct, private connection to major Cloud Service Providers including AWS and Azure for Government organizations. With CloudLink, government agencies realize:

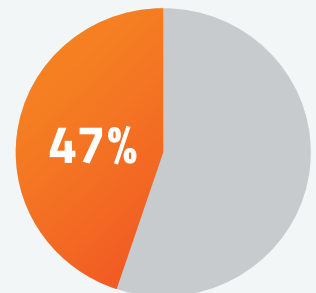

Potential cost savings through lower data egress fees

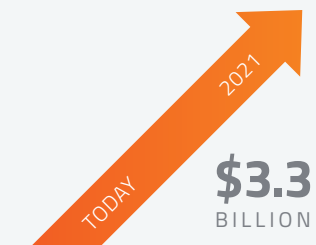

A more secure connection to the cloud built for private and sensitive data, mitigating the risks associated with the public internet

Increased performance for mission-critical applications used by citizens and government employees

47% OF GOVERNMENT AGENCIES AT ALL LEVELS NOW USE THE CLOUD.¹

FEDERAL CLOUD INVESTMENTS WILL REACH **\$3.3 BILLION BY 2021**.¹
