Product Overview

The ExtremeSwitching X465 Series is a premium stackable switch family providing high-performance, convergence-ready, resilient and secure Gigabit and multi-Gigabit Ethernet connectivity. Powered by ExtremeXOS, the X465 Series offers sophisticated routing and switching, high-speed stacking, modular uplink options, advanced PoE, and comprehensive security. This makes the X465 Series an ideal choice for high-end wiring closet and network edge deployments.

Future-Proof Switches for Flexible Use

The X465 Series includes both 24- and 48-port 1Gigabit models, multi-rate 1, 2.5 and 5 Gigabit models, as well as 24-port 1and 10 Gigabit fiber models. The family also offers 30W, 60W and 90W PoE models making the X465 an ideal wired back-end for Wave 2/Wi-Fi 6 wireless APs or to power next-gen Ethernet edge devices, such as point-of-sale terminals, cameras or LED lighting displays. The X465 also support s modular uplinks at 10G, 25G and 40G for flexible linkage to other switches or devices over a range of media.

Extended Edge Switching

All X465 models support Extended Edge Switching, an innovative solution that simplifies the deployment and operation of edge switches. As the controlling bridge of an Extended Edge solution, the X465 can be combined with Extreme’s V300 and V4 0 Series access devices to create a single logical switch architecture. The result is a simplified operational model that reduces costs.
**Integrated Application Hosting**

Select X465 Series models support Extreme’s Integrated Application Hosting which leverages the switch’s hardware and software design to run onboard applications without impacting switch performance. X465 models with a quad-core processor can run a Guest VM directly on the switch in support of third-party or customized applications – to meet specific business or operational needs. This can provide additional network insight or enable new network applications without the need for a separate hardware device.

*(NOTE: Requires a Core License)*

**MACsec Link Encryption**

The X465 Series supports IEEE 802.1AE MACsec on its 10/100/1000 access ports, as well as on its modular uplink ports. MACsec is a hop-by-hop security capability which encrypts/decrypts packets between connected switches or devices. As a link-only encryption, the switches can still apply services to the packet, such as policy or QoS, without compromising the security of packets across the link. With support for both 128-bit and 256-bit Advanced Encryption Standard (AES) support, the X465 provides the most secure link encryption.

**VIM Options for Flexible Uplinks**

The X465 supports Versatile Interface Modules (VIMs) for its uplink ports – in addition to its two dedicated stacking ports. Each X465 model has a single VIM slot that can be optionally used for uplinks. VIM options include both 2 and 4-port modules that support 10Gb, 25Gb and 40Gb data rates. VIM modules with LRM and/or MACsec support are also available.

**Role-Based Policy**

The X465 supports role-based policies that can be centrally administered through the ExtremeControl policy manager. This policy framework empowers network administrators to define distinct roles or profiles to represent specific operational groups that may exist in an enterprise. Each defined role can then be granted individualized access to specific network services or applications – and these access privileges remain associated with users as they move across both wired and wireless network access points.

**Fabric Attach**

Fabric Attach on the X465 can be used to automate the connection to Extreme’s campus-based Fabric Connect solution. Fabric Attach not only provides zero-touch edge provisioning, it also allows the X465 to take advantage of the virtualized services and inherent security capabilities of the Extreme Fabric Connect infrastructure.
Management

The X465 can be managed in a variety of ways. Simple on-box management functions are delivered by a web-based GUI, and a generic CLI is available for manual configuration.

ExtremeCloud™ IQ (XIQ) along with Extreme Management Center (XMC) also provide a comprehensive unified management capability with a consolidated view of users, devices and applications for wired and wireless networks.

* 40Gb ports on the VIMS module can also be broken out individually into 4 x 10Gb ports.

Zero-touch provisioning lets one quickly bring new X465 switches online and a granular view of devices, ports and users enables efficient inventory and network topology management.

Note: Please refer to the ExtremeCloud IQ Release Notes: New Features and Enhancements for latest list of XIQ-supported X465 models.

Location LED

A location LED on the front panel of the X465 chassis can be used to quickly identify a specific X465 switch deployed in wiring closet or a stack.

• Layer 2/MAC Addresses: 272K
• IPv4 LPM Entries: 256K max w/ALPM
• IPv4 Hosts
  • With min LPM IPv4 entries: 146K
  • With max LPM IPv4 entries: 3K
• IPv6 LPM (/64) Entries: 128K max w/ ALPM
• IPv6 Hosts: 32K max
• IP Multicast Groups: 4K
• IP Multicast (s,v,g) entries – 130K max
• Flexible Universal Forwarding Tables (UFT)
• 4092 user-created VLAN/VMANs
• 9216 Byte Max Packet Size (Jumbo Frame)
• 8 queues per port
• 8K ingress ACL rules
• 1K egress ACL rules

• OnePolicy Scaling
  • Up to 24,576 authenticated policy users per switch
  • Policy Profiles: 63
  • Unique Permit/Deny Rules per switch: 1976
• Default OnePolicy Profile
  • MAC Rules: 512
  • IPv4 Rules: 512
  • IPv6 Rules: 512
  • L2 Rules: 400

Key Features

• VxLAN Tunneling End Point (VTEP)
• MPLS/VPLS
• Extended Edge Switching Controlling Bridge
• Priority Flow Control (PFC)
• SummitStack-V160 160GB stacking (full duplex)
• Stacking with up to 8 X465/X590 systems
• 2 dedicated 40Gb ports for stacking
• SFlow/Application Telemetry
• Y.1731 OAM in Hardware

* Includes maximum PoE load ($W$) through the switch
** Does not include PoE load heat dissipated through external electronic load

### Environmental Compliance
- EU RoHS 2011/65/EU
- EU WEEE 2012/19/EU
- China RoHS SJ/T 11363-2006
- Taiwan RoHS CNS 15663(2013.7)

### Operating Conditions
- Temp: 0° C to 45° C (32° F to 113° F)
- Humidity: 10% to 95% relative humidity, non-condensing
- Altitude: 0 to 3,000 meters (9,850 feet)
- Shock (half sine) 30m/s2 (3G), 11ms, 60 shocks
- Random vibration: 3 to 500 Hz at 1.5 G rms

### Packaging and Storage Specifications
- Temp: -40° C to 70° C (-40° F to 158° F)
- Humidity: 10% to 95% relative humidity, non-condensing
- Packaged Shock (half sine): 180 m/s2 (18 G), 6 ms, 600 shocks
- Packaged Vibration: 5 to 62 Hz at velocity 5 mm/s, 62 to 500 Hz at 0.2 G
- Packaged Random Vibration: 5 to 20 Hz at 1.0 ASD w/-3 dB/oct. from 20 to 200 Hz
- Packaged Drop Height: 14 drops minimum on sides and corners at 42 inches (<15 kg box)

Ordering Notes

X465 Series switches are available in both unbundled and bundled versions. X465 unbundled versions include the X465 system, fans, rack-mount kit and EXOS Advanced Edge license. X465 bundled versions additionally include a designated Power Supply. With both versions, VIM5 modules, additional power supplies, power cords, transceiver/optics and optional Software Feature Packs must be ordered separately.

1. X465-24MU, -24MU-24W and -24XE models only support 10Gb operation (no 1Gb) on VIMS-4X and VIMS-4XE modules
3. X465-24W, -48T, -48P, -48W and -24S models are limited to 1 x 10/40Gb port on VIMS-2G module
4. XN-ACPWR-xxx-FB power supply units cannot be used with the 10941, 10951, 10953, or XN-ACPWR-2000W-F PSUs on the same switch.

Not available for Mexico, Russia, Brazil, China, Korea, South Africa, India at present, pending certification
**Warranty**

The X465 Series is covered under Extreme’s Limited Lifetime Warranty Express. For warranty details, please visit: [http://www.extremenetworks.com/go/warranty](http://www.extremenetworks.com/go/warranty)

**Power Cords**

In support of the Extreme Networks Green initiatives, power cords can be ordered separately, but need to be specified at time of ordering. Please refer to [www.extremenetworks.com/product/powercords/](http://www.extremenetworks.com/product/powercords/) for details on power cord availability for this product.

**Optics/Transceivers**

For a list of the optics/transceivers support on the X465 Series hardware, refer to our Extreme Optics Compatibility Tool at [https://optics.extremenetworks.com](https://optics.extremenetworks.com).

**Maintenance Services**

Extreme’s maintenance and support services with 100% in-sourced engineering experts and over 90% first-person resolution ensure efficient operations of your business-essential network. 24x7x365 phone support, advanced part replacement, and on-site support augment your staff with experienced resources that help you mitigate critical network issues fast. Visit [Extreme Maintenance Services](https://www.extremenetworks.com/contact) for more information.
