

Microsoft trusts Commvault. Shouldn't you?

Take control of your data with Commvault®, the Azure/Windows®-centric solution. Commvault provides the tools you need to manage, migrate, access and recover your data no matter where it resides, while reducing cost and risk.

Let's make your data a business advantage.

Commvault works closely with Microsoft® to deliver the complete data management and migration solution for today's enterprise and SMB companies. With deep integrations, and a single platform for end-to-end data management and data protection, Commvault is built and optimized for Microsoft solutions to provide data management that's easily accessible regardless of location.

Cut data infrastructure costs by up to

44%*

Leverage the Commvault comprehensive data management solution alongside your company's tiered storage strategy to dramatically reduce costs and free up resources.

Reduction in un-planned downtime

62%*

Increasing the reliability and availability of operations resulted in reductions of annual unplanned downtime among Commvault customers by 62%.

*IDC 2018 Research Study: Quantifying the Business Value of Commvault Software

Reduce administrative overhead by up to

31%*

Deploy Commvault on Microsoft Azure and let Microsoft handle data center updates, patching, and maintenance to simplify administration and reduce infrastructure without adding staff.

Microsoft Office® Products Group Deployment

Business Situation

The Microsoft Office team handles an enormous amount of data each day. Consequently, it needs a high-performing storage solution that deduplicates, provides no-fail backup, and is easy enough to use that staff time can be spent on advancing their product.

Solution

The Microsoft Office team chose Commvault software for its backup and recovery solution. Commvault is the first enterprise storage management solution built from the ground up on Microsoft Windows™ architecture.

"We wanted a data management solution that was not too complex, but it needed to meet a lot of different criteria. Commvault provides us with the peace of mind that the process can be managed end-to-end."

Shawn McCoy,
Principal Operations Lead,
Microsoft Office product development group

Commvault extends the value of Microsoft solutions

Azure

Move and Migrate Workloads Fast

Native integration speeds migration into Azure. Using Azure APIs eliminates the need for third party tools or plug-ins (agents).

Data from Anywhere

Pull data into Azure from literally anywhere. With heterogeneous support for on-premises storage, hypervisors, applications, big data, SaaS, PaaS, and other clouds, you get uniquely broad integration.

One View

A single view of your data solves the visibility and compliance issue. Commvault software “sees” the data and indexes it, providing a single view into your data. You’ll be ready for GDPR and data sovereignty—and to protect against Ransomware attacks.

Reduce Risk and Cost

Automation and orchestration simplify operations. Eliminate the danger of human error and reduce hours of administration (not to mention the cost!) and leverage AI for self-adjusting backups.

It’s Azure Certified!

Commvault is Azure Certified and available on the Azure Marketplace.

Azure Stack

Industry Leading Native Azure Stack Integration

Quickly move and manage on-premises workloads and virtualized environments.

Accelerate Migration

Rapid, protected migration to and from Azure and Azure Stack—providing the workload portability you need.

Protect Data Value

Native agent-less, policy-based, multi-tenancy data protection—fully redundant with granular recovery.

Improve Performance and Efficiency

Policy-based management tools provide automation and orchestration to reduce operational complexity and improve performance.

Office 365

Manage and Migrate Your Data

Save time with proven workflow support and increase efficiency by reducing the amount of data migrated to Office 365 (migrate only active mailboxes and data).

Search Your Data Across Your Enterprise

Improve data governance capabilities, meet compliance requirements, and address legal needs with Commvault 4-D indexing and search that includes Office 365—and all your data.

Protect Your Data

Get comprehensive, policy-driven data management, protection and recovery for Office 365 and on-premises data.

Smart Backup & Recovery

Enhance and extend Office 365 data protection with AI-enhanced, self-adjusting backup and recovery to protect all data no matter where the workloads reside.

Databases on Azure

Reduce Risk and Cost

Enterprise-grade data management and protection provide the confidence you need to move your mission critical applications and databases to Azure, reducing risk while lowering cost.

Recover in Minutes, Not Hours

IntelliSnap® technology enables rapid recovery of your most critical applications and databases, supporting a variety of SLA requirements from dev/test to critical production instances.

Availability and Scalability

The flexibility of both streaming and snap-assisted backup assure you can meet stringent availability requirements with the scalability your mission critical databases demand.

Extensive SAP HANA to Azure Experience

The right choice to manage, move and protect SAP HANA workloads in Azure. Commvault is “Azure Certified” and “SAP-certified for the integration with SAP HANA.”

Azure PaaS Long-Term Retention: Open Source + SQL

A solution for MySQL, PostgreSQL and MariaDB (also SQL/Azure) to make sure your open source databases in Azure PaaS are protected, discoverable, and recoverable.

Microsoft Partner

2017 Impact Award **Winner**

ISV Cloud Innovation Category

The IMPACT Awards recognize Microsoft’s community of partners, system integrators, and service providers committed to the pursuit of quality and innovation. In this mobile-first, cloud-first era, the work that Commvault is doing to help businesses innovate and digitally transform is more important than ever.
