

CL3000

Chlorine Dioxide, Pure and Simple

CL3000 is a concentrated, ready-to-use chlorine dioxide aqueous solution.

The solution obviates on-site production equipment. It requires no mixing or activation, which simplifies chlorine dioxide application.

CL3000 may be used in:

- Thermal storage systems
- Closed cooling water systems
- Recirculating cooling water systems
- Food & beverage processing plants
- Heat transfer systems
- Paper manufacturing machines
- Decorative fountains
- Filter cleaning and maintenance

Features and Benefits

- Pure chlorine dioxide in water
- Concentrated @ 3,000 ppm (0.3%)
- Ready to use
- No activation required
- No on-site chemical mixing
- Storage stable at room temperature
- Applied by simple chemical feed pump
- Maintains efficacy at high pH levels
- Rinses clean
